"Umm, they don't publish the B, C, and D lists. Only A, as well as wilderness trout waters. And frankly, most of my favorites throughout the state are NOT class A, many are class C or D, officially. But those classes aren't a great representation of what's happening out there. These small streams cycle so much with year classes, A one year, D the next, B the next, etc. Not ot mention longer term changes. A survey in 1976 just is not a good indication of what's going on today. Class A draws people."

PCRAY,

Taken directly from the PFBC website. Would you like to clarify this for me since you know everything? Lol. To the average person such as myself it appears that under "WILDERNESS TROUT STREAMS" they do publish whether a stream is CLASS A, B, C and so on.

CLINTON/CENTREBig Run, W Br 309C Wild Brook Trout Sec 01
Limits: From hdwtrs dwnst to mouth
Length: 9.8 km; 6.1 mi. DER WQ Class: EV
Biomass **Class: B** BT = 0.81 kg/ha
Surveyed: 1990 ST = 29.33 kg/haBurns Run 308D Wild Brook Trout Sec 01
