Pigeon Run has a very sparse wild brown trout pop. near its mouth. Can't say what it is like farther upstream. Did not electrofish farther up. Pine has a much better wild brown population. Pickering has held a few wild browns for years, but I suspect that they all come from tribs.....have never electrofished a fingerling in Pickering in a number of attempts.

Van Cleaver.....I did not check my map. Is Hartman Run an official name or a local one? Do you know for certain that it harbors a wild trout pop? We're attempting to document all wild trout streams in the Pickering and Marsh Creek drainages via electrofishing.
