Well its a good idea you are going to stop fishing the lil j .. After the recent release form the tyrone water and sewer plant . The amount of ammonia , and or other bio chem has killed the macro and fisheries for a good stretch . Dont believe ask the DEP and the case that is presently pending. Also THE FISH KILL PICS ARE POSTED ALL OVER THE NET. I live on the the j , and I wont step a foot in it .. I fish spring creek which is over 30 minutes away ... Either way have fun buying new waders and fly line after the chemo destroys them ....
