Orange Crane Fly

Tied By Chaz

Hook: #18 tiemco dry fly hook

Thread: Rusty Orange

Body: Sulphur Rabbit Fur

Wings: Dun Hackle Tips Tied over the body (not used on pictured fly)

Hackle: Brown Hackle Feathers

Tying Instructions:

Use a rusty orange thread and start by wrapping it back to the bend of the hook.

Dub either sulphur or medium gray fur dubbing and wrap around the hook until

it is 2/3 of the distance up toward the eye. Tie 2 dun hackle tips down over the body

as you would on a Henryville Special. The last step is to tie on a brown hackle and wrap

it around the hook 3 or 4 times and tie all of this off.
