Fished the Breeches Yesterday from noon 'till 1530. Weather was overcast and cool, water was a little high and murky but very fishable. Started where route 74 crosses creek and got a couple freshly stocked browns on woolybugger and Shenk's white minnow.

Headed up to Allenberry and got a couple more on small caddis and beetles tied tandem. Manny more refusals and short strikes then hookups. Still a great day on the water.

Tight lines!
