If a fishery is so threatened that it can only withstand C and R fishing, I personally, will not fish it at all, no matter what the regs are on it. Why stress a population that is that stressed already for what will in all likelihood be a marginal fishing experience at best?

I guess I just don't understand people who do this type of fishing like some don't understand that I feel the need to keep a fish every now and again. And that's fine....there's room on the water for all of us.

I'm due. Plan to fish for some stockers to keep this weekend. Thanks, trubski, for calling it to my attention.

Dear OhioOutdoorsman,

Ever heard the expression, "Twin sons of different Mother's?"

We's twins! 🤪

Regards,  
Tim Murphy 😊
