Matt,

I agree at times it can be. The reason there are so many techniques. No 1 technique is right for every situation. The most effective weapon in the arsenal is the ability to adapt, try new things and avoid preconceived ideas.

Nymphing is very effective if one is willing to experiment. Long leaders, short leaders, indicator(foam, pinch on, putty, yarn), no indicator, mono, fluoro, split shot, weight putty, one fly, multiple flies, how to rig multi-fly rigs, rod length and the various combinations. Great mental stimulation!
