I used to tie leaders to/from formula. The last 10 years or so though, I've been buying Bass Pro Shop knotless tapered leaders in 7 1/2' 3X and 9' 4X and then adding sections of material up to .013 (2 mils up from 0X) PRN as I use it up.

My leader formula these days is to adjust the damn thing until it casts the way I want it to...
