I wear Simm's Guides aqua stealth with factory studs. I've have used them for the past 3 1/2 years well over 100 days a year. The rubber still is A+ as are the Studs. Best combo for steelhead and not too bad on Oil Creek either. Not quite as grippy as felt and studs on Oil but still much better than only felt.

The only complaint I have is the boots have to be wet to get on, as the leather shrinks. So a trip to my outdoor facet precludes my fishing.
