Thanks for the advice, Im still not decided ....Tom so for a 4 weight rod and reel are you saying over line it with a 5wt DT line...excuse my ignorance , Im a bit confused and will I still fit it on a large arbor 4wt reel 🙄

That would be the down side and a concern...I don't have any large arbor reels. The last time I shared that, I think it was jay that confirmed it for me. maybe he'll stop by.
