I only cut my dt3 in half, using each half on different reels. I have no problem with casting, I only use these on my little brookie rods, longest cast might be 15 feet. my dt6 I just recently turned around, nice getting a new line for "free". as for dt vs wf, I wouldn't say one is better than the other, they will have a different feel on different rods, just as different wt lines will. it's all personal preference. I use both and like both. hell, I even use a level line for bass!! it was 6 bucks!
