How did we end up with 20 foot cast?

90' of dt split in half =45

I do not own a rod over 8 foot at the moment. I just do not see the need for the kind of fishing I do..So subtract 8 foot for the rod lenth end up with 37, add 10 foot leader =47 foot casting lenth, call it 45 if you want..

I just want to underline I through mostly dries..If I ever got in to steelies or fished out west I would invest in longer rod, but for now I just haven't the need..

Some of us just fish harder than others.
