While I don't know of any specifics as to why the chapter has fallen on hard times I can say it is typical of TU Chapters, especially when leadership changes, to go through down times. There are other reasons for this of course, main reason is issues in watersheds. If there are no issues people seem to get complacent, or simply not attend meetings, this is not always the case, and may not be the case with the Wood Duck Chapter. I advise you to join the chapter and see what's going on. You may be the person that gets things going again. There are a lot of AMD streams in the chapters region, and there are wild trout streams in the region too. you can always learn things from the chapters member that are active.
