How did we end up with 20 foot cast?

**as the saying goes** MOST of your fishing is done less than 20 ft..

Others have often said that they do most of their fishing with 20 ft casts. Thats how.

If you only fish for 4 inch fish in 12 ft wide streams, by all means, cut all your lines in half. Add 150 yards of backing you'll never use rather than just leave the line you paid 50 bucks for in one piece.

Then go out and spend another 400 bucks for an outfit so when someone invites you to fish a bigger water you can go.
