Underlining a rod?

What are your views on underlining a rod. I have a 9ft 5wt TFO Pro outfitted with a 5/6 Okuma reel and am interested in picking up a 4wt but was thinking about what other possibilities I may have such as underlining. I will probably just pick up a fair priced 7'-7'6" 4wt or 3wt but I am kind of interested in the opinions of others on underlining as I've read about it once and overlining many times.

Thanks.
