URL:

Ok so my waders have a couple of seasons on them and I was looking for ways to clean them, if at all possible. Orvis suggests using Ivory powder, but I came across this link:

[http://fieldandstream.blogs.com/gearh...6/05/wader\\_cpr\\_how\\_t.html](http://fieldandstream.blogs.com/gearh...6/05/wader_cpr_how_t.html)

Scroll down, it's called:

Wader CPR: How to Get Air Back in Your Breathables

Long and short of it is...I got this stuff and it worked pretty well. Waders are clean and breathing a little better now.

Just a head's up for those of you who want to clean your boots. Also, this stuff is good for any other breathable materials, it completely rinses out and leaves no residue and has no scent.
