Thanks for the formula I will get the material and tye some. Do you have any good nymph formula's that you us the Stren with. Again thanks a lot Justin

For highsticking I use 36" of Amnesia (thanks HA, that stuff rocks), barrell swivel then a straight length of tippet from 5-6'. I usually use 4x flouro, but I'll throw on mono also, I don't think the fish care either way.

I agree with Osprey about stren, it's crap.
