Depending on what you'll be fishing for there I would go with a decieverish fly. Once you research saltwater flies you'll discover a trend in color size etc... Also look into Puglisi flies and materials. I love the "stuff" for tying and use it to tie clousers and various forms of shrimp, crabs and deciever looking flies. Seaducer is another great pattern. 1/0 or 2/0 hooks are somewhat standard. Also, google the Schminnow. I dont know how it will work in NC but the Snook off the beaches here love em. Easy to tie, its just like a wooly bugger with eyes and no hackle. Check it out. Good luck
