also look at the Scott rods. the A2 is a nice med fast rod that is very versatile. it can throw a sz 20 dry or a weighted bucktail with ease. i have the pre series, SAS, in a 9" 5wt and it is my got to rod for larger water and for all around nymphing and streamer fishing. you may also like the TFO professional series rods. i have the (' 5wt and really like it. i bought this to go out west because i wanted a 4 piece rod, the SAS is a 3 piece. it's a hair faster than the A2 but for throwing out line is good. i broke both rods this spring and both companies replaced them with no hassles, just had to pay the minimum service charge.
