Kid,

Canoe Creek Lake has an abundant musky and bass population, which is managed under the "Big Bass" regs. Thousands of rainbow trout are stocked in this lake each year and the gamefish have found them very suitable to the palate! Caught my first musky while bass fishing and it was great. The lake is not terribly suited to wade fishing, but from a small water craft, especially a boat with a trolling motor, it provides excellent opportunities for musky and LARGEmouth bass.
