Traveling all month of Dec and begin Jan for work. I'll post them up when I have some down time.

My first report is that the Artbin case isn't sturdy enough. I cracked the side of mine recently. But Flambeau makes a similar case that is more sturdy called the Tradesman and the Merchant. You can buy them "naked" at: <http://www.flambeaucases.com/index.php?p=catalog&mid=2>

I'm going to order one of these and see if they will hold up a bit better.
