Well we don't have any trout, but a guy up the road from me plays the pipes 🎺 . Its cool hearing them echo down through the woods.

Yes PA has great locations. Many people compare some of our limestone waters in the center part of the state to English chalk streams. If you come in July you will probably have to concentrate on these limestone streams due to water temps and flows.

Keep us posted, if you come out I am sure that a "delegation" could be assembeled to take you fishing.
