Last year I had a gift card and bought a C&F fly box (#1506 I think). It's the best box I ever owned. It's the one with the flip page. The specs say it will hold 564 flies, but you can probably do 300+ comfortably. Who the heck needs that many flies on the stream anyway? I only use that one box now. You can get it for \$32 if you look around, maybe cheaper.

My second choice is Bug Luggage. Another very good box.

I probably have a couple dozen fly boxes of all kinds stored in a backpack.. Plus most of them have flies in them. Some day I need to get organized, sort my flies, and I'll find out I'll never need another fly for a few years.

When you get down to it, probably any old fly box will do the trick.

John
