Sub-surface , gold ribbed hares ear nymph or small wooly bugger , Surface , small black foam bodied ant or any downwing caddis/stonefly type fly , smaller usually , both fished first dead drift and then with a lil motion. If i had these 4 flies available to me in a survival situation i would survive. I don't know why i look at things in that light , survival i mean , maybe it's a sign of the times , can't help it.
