OK, not to be a smart a\$\$, but which fish species is the target? I figure you're asking about trout flies, but it really does depend. It also depends to some extent on fresh or salt water.

Fresh water: Woolly Buzzer by a mile (caught trout, bass, all panfish, pickerel on a #8 black buzzer). Vary the size/color/material and it can imitate darn near anything in fresh water!

Saltwater: Hmm... I like fishing Gartside Gurglers 'casue I'm a topwater fool (caught stripers, fat alberts, baracuda, snook, sail cats, redfish, sea trout, jacks), but I think Clouser Deep Minnow gets the nod for all-conditions performance. Vary the hook size, eye weight and color to suit conditions.

YMMV...
