I would stick to the 9' 7wt. A switch rod has better use on a steelhead river. Ask the guy to cast a 9 footer 100 feet. should be able to do it. sure you can use it for trout but under NORMAL circumstances a 9' rod is best. I hve been casting swith rods since they came out, I do like them but only for certian situations. the butt most likely will interfer with your casting from a yak.
