Hi, I'm tom..."Hi Tom..." and i'm a stock-a-holic.

I've been hitting the local put and take lake frr an hour or so ever now and then since they stocked and have been doing best on dries. I have a black gnat immitation and adams in 14 that have been working very well. It warmed up this week and the water has been boiling. Love watching the bait dunkers cringe when I release those fish. Been taking them all on top. Had some hits on olive buggers but only a couple of takers compared to the surface action.
