This report is in no way a guarantee that you will catch fish. Maybe you are a better fisherman than the next guy or they may be better than you. Or maybe they just happened to find the hole where the fish are, whatever the case I simply report what the anglers and/or guides tell me. What I can tell you is we have had a couple beautiful days here in NW PA. Steelhead are in all the creeks and spread out. So fishing shoulder to shoulder may not be the issue. With the water being clear the smaller baits are reportedly doing better. We are expected to get rain over the weekend, so it should effect the creek level and the type of bait that will be working. Captain Pete Alex from Vision Quest charters @ dreamsteelie.com has been trolling in Presque Isle Bay with great success. He boated a five-man imit by 11 a.m. His hot colors have been red and orange. Keep the bait flying and the steelhead jumping.
