I dropped mine because of all the destination articles and Barry Beck photos. The only destination mag I would get is Eastern Fly Fishing at least the places are close to home .

Oh on a second note is there going to be a lot of people going to stop buying Sage rods, because the Becks are now endorsed by Sage they were working the Sage both at the fly show . 🤔

The Becks have been associated with Sage for a long time. They were a Sage dealer in their fly shop in Benton and even before they sold their store, they were on the Sage advisory board and fished with and promoted their rods for as long as I can remember.

Barry has always promoted tying and fishing wooly buggers. I think I'll empty my fly box of buggers and burn all my marabou. Also I'll close my eyes when I inadvertently see the cover of FFM with a Beck photo. Perhaps we should boycott the book stores and news stands until put a plain wrapper over FFM like they do with the porn mags. 😊
