Recommend a chest pack?

Alright. Plans are definitely to get on the water this year (I'm a noob). I have a vest that I used when spin fishing, but I don't like the bulk or the fit. I'm thinking a nice chest pack would do the trick, stay lightweight, and work best overall. Problem is, I really only hear of fishpond being discussed on here. Are they the go to brand? Any recommendations for \$60-\$70 max? I don't need a HUGE carrying capacity, but I'd like to be able to carry the essentials. So, what are you thoughts?
