PaulG, JackM and I met at the Breeches while Jack visited H-burg on business. We started below the dam and did ok using buggers, ants caddis, white spinners and sulfur emergers. At twilight, Jack and I moved up to the slow water, to the "demoralizing dimplers". I picked up one on a spinner on the first cast and quickly switched to a wolly bugger before it was too dark to see. Jack did the same quite a bit later in the end he landed a 17" brown and I a 19" bow.
