I usually have a good idea how many I've caught, but I don't count. If I catch 8 in a day, I probably lost count at 4 and if you asked how many, I'd tell you 9-11. If I caught 9-11, I lost count at 3 or 4 and will probably tell you I caught 7 or 8.

If I have a day that I catch more than 13, then, beginning this year, I am just going to report that I caught 100, though for fun I may claim 99 so that all eyes will be on me to watch me break 100.
