What are your thoughts on fish counting?

Does this effect your outing?

Do you ever move spots?

How quickly does it take you to decide this?

I really don't count but I am always saying to myself I want to catch one more.

As far as affecting my outing the answer is NO!! I just love to be out there.

I am always moving. To me it is hunting without killing. I like to find fish in different places.

I usually move after 5 or 6 casts.

Fishing is fun and I can unwind when I am at the stream. I don't stress my self out if I don't catch a fish. There is always tomorrow. 😊
