I count, I lose track after 8 but I usually don't catch that many so it's not really an issue. I don't keep track of sunfish or chubs unless it's a really slow day or I'm trying to see if I can get 25 in an hour or 50 in a day or something like that. If I'm not doing well, even on most medium sized creeks, I don't hesitate to move.
