Pcray,

I meant nothing by my statement but the truth. The other side of the bank is a neighborhood with houses having their grass abut the stream. Thats how they get access, im not saying they dont have the right to be there. I think you thought i meant more by that. The only fly-fisherman i see are the ones we brought there.

In the past few years i have been a major advocate of public access and putting these stupid grinds away. We need everyones help or we could lose just about everything.
