Here is it, buried somewhere in the PFBC site.

Conservation Acquisition

Partnership Program

The Conservation Acquisition Partnership Program, known simply as CAP, was created by the Pennsylvania Fish and Boat Commission to solicit and accept donations to be used solely to obtain additional access to Pennsylvania's waters. As population centers expand, more and more waterfront land is lost forever to development, and Pennsylvania's sportsmen and women find that they have fewer and fewer places in which to pursue their favorite pastime. CAP was created to help to stem that tide.

How? By taking money donated by those who really care about the future of the sport of fishing and their children's and grandchildren's and great grandchildren's access to it. Then making that money work harder than it ever could by itself. **Every dollar donated to the CAP will be matched with a dollar from the Fish and Boat Commission. But it doesn't stop there. These combined funds will be used to attract other partners -- conservancy, corporations or others, and ultimately be used as matching funds for federally supported acquisition projects. In fact, your donated dollar could potentially turn in \$8 or more of buying power!**

However, the success of the CAP Program is dependent on the generosity of people like you. That's because it takes that first donation -- yours -- to start the ball rolling. No amount is too small, and certainly, none is too big. The future starts tomorrow, but you can only influence it by what you do today!

~~It really makes sense to donate to this fund since each dollar donated is matched and multiplied as highlighted above. Perhaps to make it more relevant to each angler, the fund can be broken up by region (NW/SW/NC/SC/NE/SE)???~~
