I don't seem to have much trouble with the foam turning on the hook. I lay down a base of thread and then tie in the foam at the bend of the hook. I tie an underbody of peacock herl and sometimes black hackel for legs. Then pull the foam forward and finish the head. I also use orange foam in place of black or brown. This works well for me and they are a lot easier to see and the fish don,t seem to mind.
