I own the Cabelas River Guide waders and absolutely love them. I love the pocket in the front and inside. I always get the stocking foot ones because I always have the boots go before I get a hole in the waders. If you go neoprene I'd get the Hodgman Lake Stream...best neos I've ever found and I've tried a ton of different styles and brands. If you are buying boots for your waders definitely go with Orvis because Orvis will allow you to return your boots when the felts tear off or most other problems with the boots. Yeah you can glue them back on but seldom do they hold for a long time. You can't go wrong with the Cabelas and Hodgman waders and the Orvis boots.
