I have been fly fishing for over a year now. I live in the Texas (Austin area). I have been wading with just shorts and some neoprene scuba boots for foot protection, in the local rivers, streams and also when I go to South Padre for Reds and Speckled trout in the bay. Not to long ago I purchased some waders and felt bottom boots that were a really good deal. My question is; what do you guys normally wear under your waders in cold, cooler or even in hot weather? any suggestions?

Mario
