Ditched all that stuff.

Using a lanyard to hold tippet spools, nippers, hemo's, and floatant.

I put a snack and tp in the zipper pocket in my waders.

My waterproof camera goes in the outside wader pocket. My use a water bottle holder on my wading belt to hold a nalgene.

I make use of a fishing shirt with two big front pockets to hold 2 medium fly boxes.

If cold or wet- I wear a jacket and the fly boxes go in the jacket pockets.

I have cycled through the sling type, couple vests and a downs chest box and this is what I have settled on for now.

Good luck in the never ending battle with gear.
