That said, on fisheries that need extra protection (and NO I don't believe it is every wild trout stream) I have no problem with more restrictive harvest limits or prohibitions.

i almost choked on my lasanga. did i just read this right? the guy that argued regs with me. nor have i ever said ALL wild trout streams. what i have eluded to is why half of our wild trout resource isnt more regulated. if a stream isnt class b or better.....it should have way stricter regs.
thank u jack....this whole time i thought u were against ALL reg changes. 🙏
