Ditched all that stuff.

Using a lanyard to hold tippet spools, nippers, hemo's, and floatant.

I put a snack and tp in the zipper pocket in my waders.

My waterproof camera goes in the outside wader pocket. My use a water bottle holder on my wading belt to hold a nalgene.

I make use of a fishing shirt with two big front pockets to hold 2 medium fly boxes.

If cold or wet- I wear a jacket and the fly boxes go in the jacket pockets.

I have cycled through the sling type, couple vests and a downs chest box and this is what I have settled on for now.

Good luck in the never ending battle with gear.

I hope you kept all your old options. You never know when you might want to revert back to one of them.

Your last sentence pretty well sums it up (at least for me)!
