I have noticed in many threads "skitter" the fly has been mentioned. So i would like to learn how or know how. I advance searched "skitter" from the beginning that word is mentioned more often than i have thought. Threw "poke and hope" at misc. threads that appeared i have found two threads that i book market, for later reference, on other reasons (uses of the 3 style wings on drys and grannom ID.)
So how do you skitter a fly ? or create the illusion of a hatch ?
