Good vid, I never thought about greasing the leader, will do that from now on. Love the way those trout hit the fly when you skitter it, they dont mess around!

PaulG

Yeah Paul. also one of the things I like about using furred leaders is you can grease it up when you start fishing, and it float most of the day. The paste gets between the twisted segments and lasts a long time. I use Muscilin green right now, but just bought Loon Payette Paste to try out. Lube up and have a ball!

Tom

Already have my new furred leader on, thanks to you! I've never used one so Im eager to try it out!
