How many different cased caddis patterns do you carry streamside ?

I carry 4 specific cased caddis imitations, and I think I have 3 wet fly patterns that I carry that are probably taken as cased caddis. I think the bottom line is, with so many patterns available, that whatever pattern you have the most confidence in will be the one you fish most effectively. I generally don't fish outside of Tioga and Potter counties, and my patterns are geared for the streams that I fish here. Get me downstate, and the patterns that I fish here may not be as effective. I know that patterns that worked great on the Pocono streams aren't so hot up here. I think when it comes to cased caddis, one should adjust the colors and textures to mimic what's going on at the homewaters.
