I have not been in the market for a jacket in several years- so I am not current on all the models.

Some questions that might help others help you would be: How much do you want to spend? What times of the year will you be using the jacket? etc...

My one tip that might be helpful is I would recommend to buy a shorty jacket. Meaning a jacket that comes down to your waist or bellybutton so when you wade a little deep the jacket does not hang in the water- thus getting soaked. But if you dont wade too deep you can probably just buy any raincoat.
