I reread my post, and don't want it to sound like an underhanded compliment.

I wasn't expecting a bad book, I just had no idea how information on such a broad and complex subject would be arranged. Your book, in my opinion, is a fine example.

I also was not expecting "limestoners" to be covered, rather just spring creeks. I was pleasantly surprised to find that wasn't the case. Another part I enjoyed was that the distinction between them was covered, as that's something I have tried to explain to new FFers before.
