Every year we seem to get bit or get a flash of a musky on opening day. They like stocked trout, especially ones struggling on the end of a line, hehe. Never actually hooked one though, assuming I need bigger hooks for that. Been quite often you see a big flash, the rod doubles over, and then the trout you were fighting is suddenly just gone.

My brother targets them in Tionesta Creek below the dam and does pretty well. He throws the enormous figerglass lures with spinning gear.
