Esox, and Pike are caught in the same manner! The flies I notmally use are 10-14" bunny leeches. I use surflon "mono coated wire 7 strand" You can make a hay wire twist with it and burn it to melt the plastic to make the twist hold! The mono coated wire you can tye knots with it. I used 10" of the monocoated wire and thats it. Short leaders like 7-8' These fish feed ,and being nice about it is not in thier personality!... Good luck guys, and please handle these fish with kid gloves. Thier survial rate is not good with a bad release! Dont flop the fish in the bottom of the boat keep them in the water.
