i got the A-5 model albright , 7'6 wt and overlined with 5 wt double taper , great for small streams but will handle the wind and streamers a little better than a 3wt but a 3wt for strictly brookies will be my next rod and it will be an albright !

I've had my eye on the 7'6" 5 piece 3 weight from albright for a while. Hopefully I'll be able to buy it in the next month or so for this season. I've seen many good reports of their equipment.
